

HIGHLIGHTS: We have come to the end of the hurricane season. As we enter into the dry season Continue to be prepared. View various bulletins and outlooks issued by the Caribbean Regional Climatic Centre (Health, Agriculture, Heat outlook etc.) Read the Caribbean Agro-Climatic bulletin of CariSAM and other national bulletins.

November 2021 Summary

In the month of November, low to mid-level moisture coupled with low level troughs and favourable mid to upper atmosphere resulted in pockets of heavy to moderate showers and cloudy skies across SVG. In addition, after several days of unsettled weather conditions, the Atlantic High pressure system re-established itself over our area, which resulted in relatively dry atmosphere and fair conditions. Total rainfall for the month of November 2021 at the Argyle International Airport (A.I.A) was 199.7 mm (7.86 inches), with

Advisory Statements

Water: The availability of water may be disrupted during the passage of weather systems therefore; residents should store adequate quantities of water for drinking and sanitation purposes.

Agriculture: As SVG transition to the dry season, the possibility of dry spells increases. To ensure food security, farmers are strongly advised to make preparations to employ conservation and irrigation practices.

Health: Due to the ongoing COVID-19 pandemic, water availability should be monitored as it is critical for the purpose of sanitization. Conversely, the presence of stagnant water after rainfall may promote the breeding of mosquitoes. Anti-mosquito fogging operation and public awareness campaigns should continue.

Forecast Information
