# Flash flood potential associated with excessively wet days – in Feb.-Mar.-Apr. 2023

Flash flood potential	Colour codes	Chance of excessive rainfall event
<b>EXTREMELY HIGH</b>		>80%
<b>HIGH</b>		50-80%
<b>MODERATE</b>		20-50%
<b>SLIGHT</b>		10-20%
<b>MARGINAL</b>		0-10%

Flash Flood Potential in Feb-Mar-Apr 2023

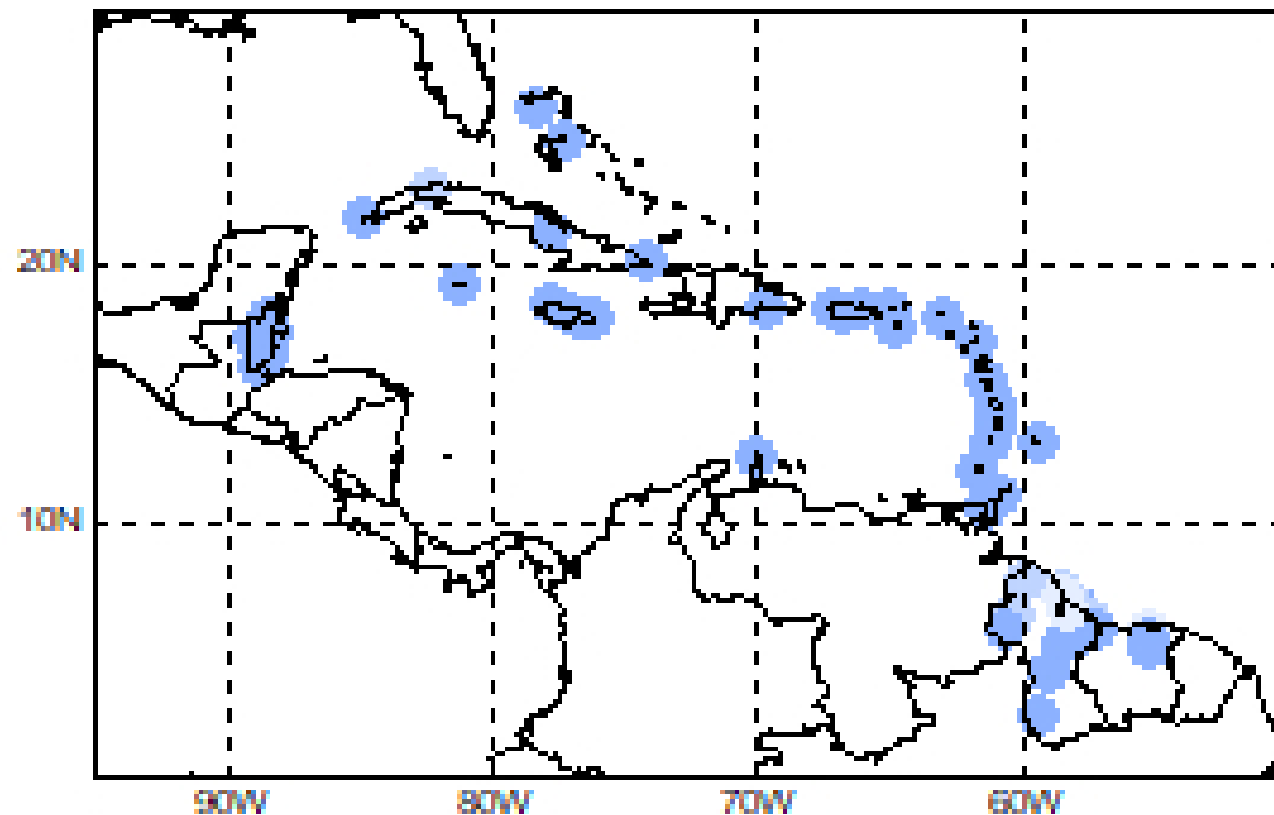

**FORECAST:** Moderate to high flash flood potential in Eastern Cuba and coastal Guianas; slight to moderate potential in the northern Bahamas, elsewhere in Cuba, Dominica, southern Dominican Republic, inland Guyana, Jamaica, the Leeward Islands, Martinique, Saint Lucia, St. Vincent; marginal to slight potential in Aruba, Barbados, Belize, Cayman Is., MartiniqueTrinidad & Tobago.

# Flash flood potential associated with excessively wet days – zooming in on **February 2023**

Flash flood potential	Colour codes	Chance of excessive rainfall event
<b>EXTREMELY HIGH</b>		>80%
<b>HIGH</b>		50-80%
<b>MODERATE</b>		20-50%
<b>SLIGHT</b>		10-20%
<b>MARGINAL</b>		0-10%

Flash Flood Potential in February 2023

**FORECAST:** Slight to moderate flash flood potential in coastal Guyana;  
marginal potential in most other areas.
