Flash flood potential associated with excessively wet days
– in **May.-Jun.-Jul. 2023**

Flash flood potential	Colour codes	Chance of excessive rainfall event
EXTREMELY HIGH		>80%
HIGH		50-80%
		
		
MODERATE		20-50%
		
		
SLIGHT		10-20%
MARGINAL		0-10%

Flash Flood Potential in May-Jun-Jul 2023

FORECAST: Moderate to high flash flood potential in The Bahamas, Belize, the Greater Antilles, Grenada, across the Guianas and Trinidad & Tobago; moderate potential in the Lesser Antilles; slight potential in the ABC Islands.

Flash flood potential associated with excessively wet days
– zooming in on **May 2023**

Flash flood potential	Colour codes	Chance of excessive rainfall event
EXTREMELY HIGH		>80%
HIGH		50-80%
		
		
MODERATE		20-50%
		
SLIGHT		10-20%
MARGINAL		0-10%

Flash Flood Potential in May 2023

FORECAST: Slight to moderate flash flood potential across the Guianas and the Leeward Islands; marginal to slight potential across the remainder of the region.
